The problem we aim to solve

Now a days many people are facing difficulties in tracking the time they are spending in doing their chores so we came with a basic solution to track the habits

Target audience

Our app is designed for tech-savvy individuals aged 18-40 with a keen interest in productivity and lifestyle enhancement.

Market Overview

12.3%
Market Growth Rate

\$2.05 Billion
Market Size

demand for self-improvement and personal growth, coupled with the increasing adoption of smartphones, is driving the growth of the habit tracker app market

Roadmap

Requirement analysis

- Technical Aspects
- Legal Feasibility
- Economic Feasibility
- Operational Feasibility

Problem from customer point of view

- Difficulty in tracking habits
- No individual habit tracker
- hard to maintain consistency

Implementation

- Used Flutter
- Dart (Programming Language)
- Took reference of various sites

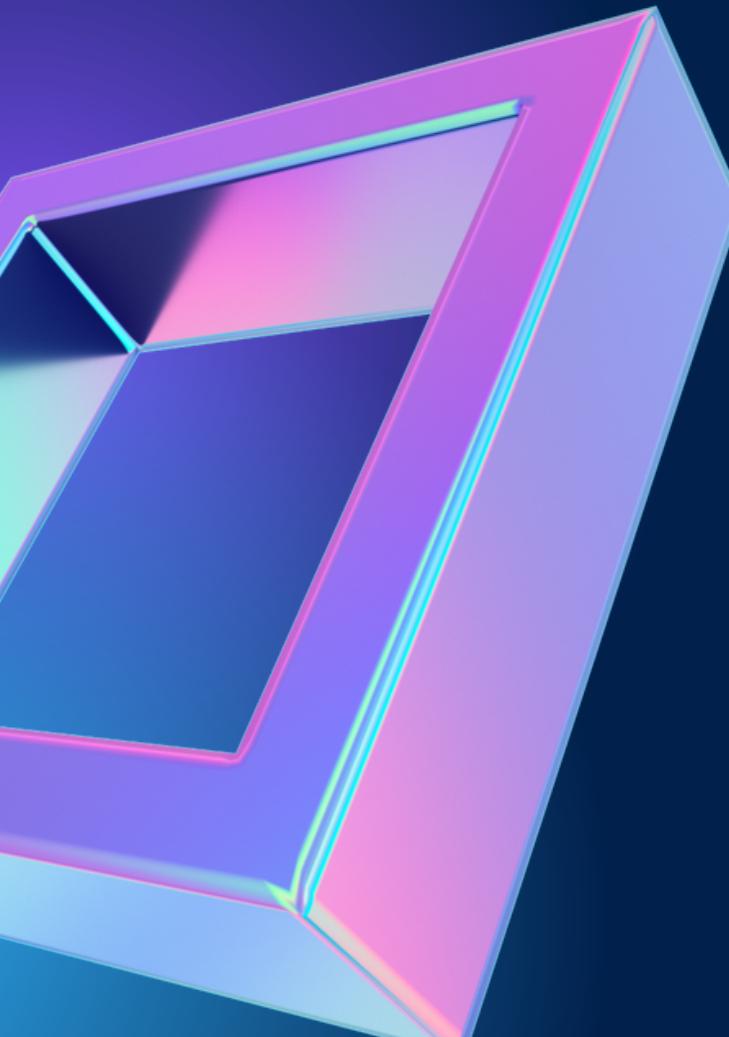

Functionalities

- User Friendly Interface
- Flexibility in editing the habit
- A time tracker for each individual habit
- Focus session (our main functionality-USP)
- Monitoring Habits on weekly basis to discover top and worst habits of the week
- Graph to indicate the habit performance to give the user an insight instead of streaks

Prototype and Future Scope
